

Quotation for Standalone Website and Essential Clinical Library

Project Scope (Simplified)

1. Standalone Website:

- Responsive Design: Simplified layout for desktops and mobile devices.
- Core Features:
 - * Home page with clinic info, mission, and services.
 - * Contact page with form submission.
 - * Basic SEO setup and analytics integration.

2. Basic Clinical Library:

- Patient Record Management System: Essential setup for securely storing and retrieving records.
- User Authentication and Roles: Secure login for providers and admins (patient portal can be added later if needed).
- Search Functionality: Basic search capability for patient and clinical records.
- HIPAA Compliance Basics: Data encryption and user tracking for compliance.

3. Hosting and Deployment:

- Hosting Setup: Economical cloud hosting with SSL setup.
- Database Setup and Optimization: For secure, efficient data storage.
